

# — HOW *to* PLAY —

# FREE BET

# BLACKJACK

**Free Bet Blackjack** is a variation of the standard game of Blackjack that allows players to double-down and split on most cards for free. To start, players make a bet against the dealer. Each player and the dealer will get two starting cards, as in standard Blackjack. Next, depending on the player's cards, players have the following Free Bet options:

- ◆ If the player chooses to use the Free Bet for Splitting and/or Doubling, instead of the player putting up more chips, the dealer will place a special Free Bet lammer next to the cards.

## Free Split

- ◆ Players can split any pair, except 10-value cards, for free. Free re-splitting is allowed. When "free splitting" aces, they may only be split once and players will only receive one card on each ace.
- ◆ When a "free split" wins, the dealer will pay the player an amount equal to the original wager for each winning "free bet" button.

*Note: Standard Split rules apply when splitting 10-value cards.*

## Free Double

- ◆ Players can double their bets on any hard 2-card total of 9, 10, or 11 for free. Free doubling after splitting is allowed, when the above double rule is followed.
- ◆ When the "free double" hand wins, the dealer will place chips equal to twice the amount of the player's original wager next to the player's wager and remove the "free bet" button.

When the hand loses, the Dealer will collect both the original wager and the "free bet" button. If the "free double" hand results in a push, the Dealer will signal a push and collect the "free bet" button.

## Push 22

- ◆ If the dealer busts with a point total of 22, any bets players have left in action will be a push.

*Note: Player Blackjacks are paid before the dealer hits out their hand, so they are exempt from the Push 22 rule.*

## Surrender

- ◆ Players may NOT surrender in Free Bet Blackjack.
